Moreover we are also offering our entire range of industrial chemicals in various effective packaging as per the requirement of our clients ensuring safe delivery.

### High GSM Sumitomo Sap Gel Sheet for Ultra-Thin Pads

Gel sheet can diffuse , absorb and lock the liquid instantly and tightly , prevent the liquid from side-leaking effectively, The Gel Sheet is used to the high quality sanitary napkin.

### Production process :

Firstly, the wood pulp fiber is evenly distributed on the web with the help of a special technic. Then a certain proportion of glue or thermoplastic fiber is applied to it. Finally, all these ingredients are heated and pressed to become quality airlaid paper.

### Features :

This material can dispose easily, doing no harm to the environment. So the absorbent paper is called "green" Nonwoven. It's of high absorptivity, especially when mixed with a definite proportion of SAP. Our absorbent paper can diffuse , absorb and lock the liquid instantly and tightly .
